

Alliant/Prime Therapeutics NetResults Formulary 2024

Welcome to the Alliant/ Prime Therapeutics Net Results Formulary 2024. A formulary is a list of covered brand and generic prescription drugs. Many commonly prescribed drugs are listed in this guide.

Please remember this is not a complete list of drugs covered under your plan's prescription benefit. This list is reviewed and updated regularly so coverage may change over time. Some of the changes we can make include adding or removing drugs, adding, removing, or changing utilization management edits (quantity limits, step therapy, prior authorizations). **To see when this formulary was last updated, please check the date on the bottom-right of page 3.**

Alliant Health Plans will generally cover the drugs listed in our formulary if the drug is medically necessary, the prescription is filled at a network pharmacy, and other plan rules are followed. Please refer to your plan document for detailed information about your drug benefit coverage.

For assistance finding a specific medication not on this list, please use the [Formulary Lookup Tool](#) or call Prime Therapeutics Customer Service at (800) 424-1799.

Pharmacy Formulary Exception Request

If you have medical circumstances that may warrant an exception to a drug-specific benefit, coverage limitation, or need access to a drug not on the plan formulary, you or your prescribing physician may file a request for an exception with Prime Therapeutics. Prime Therapeutics is the Pharmacy Benefit Manager (PBM) for Alliant Health Plans.

You can request a Formulary Drug Exception Request online by using our online form <https://alliant.primetherapeutics.com/member/drug-exception/>

Brand Name Drugs with Brand-Equivalent Generic

From time to time, we evaluate the formulary for changes that will benefit our members. One such case is with brand-name vs. brand-equivalent generic drugs, which have the same active ingredients. When a brand-equivalent generic drug becomes available on the formulary in place of a brand-name drug, then members benefit in most cases by paying the lower generic tier for their medication. In these situations, the brand-name drug will move to a different tier and/or will be excluded from the formulary. If you notice your brand-name drug's tier has changed or is now excluded from the formulary, please confirm that a generic brand-equivalent drug is available.

Additional Information on Generic vs Brand Classification

Prescription drugs are classified as either a Brand drug or a Generic drug. The Brand or Generic status is provided by a nationally recognized company providing drug product information. The

Brand/Generic status for a specific drug/specific marketer can sometimes change over the life of a product in the marketplace and change from Brand to Generic or from Generic to Brand. Such changes might change your copayment/coinsurance share. Brand drug or Generic drug status is never based upon a product having a trade name. Generic drugs often have trade names.

How to read the Alliant NetResults Formulary

The first column displays the drug name. Brand name drugs are capitalized (e.g., FARXIGA) and drugs with generic names are displayed in lower-case italics (e.g., *simvastatin*).

The middle column displays the drug tier. See descriptions below.

The right column will indicate if there are any limits and restrictions associated with the medication. You can find a list of abbreviations that may appear on the next page.

TYPE	DESCRIPTION
 Quantity Limit	There is a limit on the amount of this drug that is covered per prescription, or within a specific time frame.
 Step Therapy	In some cases, you may be required to first try certain drugs to treat your medical condition before you move up a “step” to other drug options.
 Custom	This drug has unique restrictions.
 Health Care Reform Products	The Affordable Care Act (ACA) requires certain preventive generic products to be covered at zero dollar copay. This does not include plans that are grandfathered.
 PA Applies	Your provider is required to get prior authorization before you fill your prescription, which ensures appropriate use of the selected drug. Without prior approval, we may not cover this drug.
 Quantity Per Day	Quantity Per Day.
 Brand For Generic	Brand products that would bypass the DAW penalty. The strategy prefers brands over generics.
 Specialty Drug	Core Specialty
 Medical Benefit Prior Authorization - Drug may be available on the medical benefit after prior authorization	Drug may be available on the medical benefit after prior authorization
 Plan Benefit Exclusion - Refer to Plan COC	Plan Benefit Exclusion - Refer to Plan COC
