

Introduction

To help you know how drugs are covered by your plan, we are pleased to provide you with a copy of our Preferred Drug Guide. This guide provides helpful information on the Prime Therapeutics Management Drug List and your pharmacy benefit plan. You may want to take this guide with you when you see your doctor to talk about what is covered under your plan.

Many commonly prescribed drugs are listed in this guide. Please remember this is not a complete list of drugs covered under your plan. Because thousands of drugs are included in your pharmacy benefits plan, we only list the most commonly prescribed ones. It represents an abbreviated version of the drug list (formulary) that is at the core of your prescription drug benefit plan. The list is not all inclusive and does not guarantee coverage. In addition to using this list, you are encouraged to ask your doctor to prescribe generic drugs whenever appropriate.

Note: The decision concerning whether a prescription medication should be prescribed must be made by you and your physician. Any and all decisions that require or pertain to independent professional medical judgments or training or the need for and dosage of a prescription medication must be made solely by you and your treating physician in accordance with the patient/physician relationship.

Pharmacy Benefit Programs

You are enrolled in a six-tier/open formulary plan. Six-tier means your plan has six different co-pay (or co-insurance) levels that you pay out of pocket for your covered prescription drugs.

Open formulary means your plan covers most prescription drugs. Your plan may not cover certain drugs, even though some are listed, such as contraceptives, infertility drugs, erectile dysfunction drugs, and diabetic supplies. Please see your plan documents for a complete description of your pharmacy benefit or call Member Services at the toll-free number on your member ID card.

Tier 0: Value Based Drugs

Tier 1: Covered generic drugs

Tier 2: Covered preferred brand-name drugs

Tier 3: Covered specialty preferred drugs

Tier 4: Covered non-preferred generic or brand-name drugs

Tier 5: Covered specialty non-preferred drugs

Preferred Drug List

The Preferred Drug List (formulary) is meant to give you a general view of drugs covered by your plan. Changes to the list are based on the latest medical findings as well as information from the Food and Drug Administration (FDA) and drug makers.

This list includes both brand-name and generic drugs and is updated regularly. Your Health Plan will generally cover the drugs listed on our Preferred Drug List as long as they are medically necessary and plan rules are followed. Coverage is not limited to drugs on the Preferred Drug List.

Your plan has different co-pay or co-insurance tiers for generic, brand-name, preferred, and non-preferred drugs. Usually, preferred drugs are covered at a lower co-pay or co-insurance tier, which means you pay less out of pocket for those drugs. The Preferred Drug List is subject to change. We choose drugs for this list based on reliable medical data, safety, and cost. Many drugs, including drugs on the Preferred Drug List, are subject to rebate arrangements between Prime Therapeutics Management and the manufacturer of those drugs.

When you talk to your doctor about what drug may be right for you, it is important to remember that you and your doctor are responsible for making the final decision on your drug therapy.

Review of the Preferred Drug List

Prime's Pharmaceutical and Therapeutics (P&T) Committee reviews available clinical literature for drugs that have been approved by the FDA. The primary purpose of the Committee is to assist in developing and monitoring the Preferred Drug List, and to establish programs and procedures that promote the appropriate and cost-effective use of medications.

Preferred Drug List Development

Prime's P&T Committee meets regularly to review new drugs and new information about drugs that are already on the market. The Committee reviews available information concerning safety, effectiveness, and current use in therapy. The P&T Committee reviews the scientific evidence from American Hospital Formulary Service Drug Information (AHFS-DI), IPD, Micromedex, and other databases, including relevant findings of federal government agencies, pharmaceutical manufacturers, medical professional associations, national commissions, and peer-reviewed journals. Our P&T Committee includes licensed pharmacists and doctors. All committee members must tell us if they are in a situation that can create a conflict of interest or if they have a financial stake that might affect their decisions. Once the P&T Committee completes its clinical review, we also consider overall value (including cost and manufacturer rebate arrangements) and other factors before adding or removing a drug from the Preferred Drug List.

Prior Authorization

Prior Authorization* encourages the appropriate and cost-effective use of drugs by allowing coverage only when certain conditions are met.

For example, prior authorization promotes compliance with dosing guidelines. It also helps health care providers avoid inappropriate duplicate therapies as well as check that a drug is being used based on generally accepted medical criteria. The prior authorization (subject to change) program is based upon current medical findings, FDA-approved manufacturer labeling information, and cost and manufacturer rebate arrangements. If your plan requires prior authorization, the following applies:

- Your doctor or the person you appoint to manage your care must contact Prime Therapeutics Management to request approval for coverage of the prior authorized drug. If we approve the request, we will notify you or your doctor. The drug will then be covered at the applicable co-payment or co-insurance under your plan. You will also be notified of approvals where the state requires notification to members.
- If the request is denied, you and your doctor will be notified. You can still purchase the drug for the full price. For information on whether prior authorization applies to your plan, please refer to your plan documents or call Member Services at the toll-free number on your member ID card.

* The prior authorization list is subject to change.

Quantity Limits

Your plan may limit the amount of a drug you can receive at one time. These limits help your doctor and pharmacist check that the drugs are used appropriately while promoting patient safety. We use medical guidelines, FDA approval, and guidance from drug makers to set these coverage limits. The Quantity Limits program includes:

- Dose Optimization Edits – Limits coverage of prescriptions to one dose per day for drugs that are approved for once or twice-daily dosing
- Maximum Daily Dose – A message is sent to the pharmacy if a prescription is higher than the maximum allowed dose
- Quantity Limits Over Time – Limits coverage of prescriptions to a specific number of units in a defined amount of time

Step-Therapy

With step-therapy, you must try one or more prerequisite drugs before your plan will cover a step-therapy drug. Prerequisite drugs are FDA-approved, treat the same condition(s), and they may also be available to you at a lower co-pay or co-insurance tier. If it is medically necessary for you to use a drug on the step-therapy list, your doctor or the person you appoint to manage your care may request a medical exception. If the request is approved, we will notify you or your doctor. The drug will then be covered at the applicable co-payment or co-insurance under your plan. You will also be notified of approvals where states require it. If the request is denied, we will notify you and your doctor.

For information on whether step-therapy applies to your plan, please refer to your plan documents. You may also call Member Services at the toll-free number on your member ID card.

Therapeutic Duplication

Therapeutic duplication is a potentially dangerous situation that occurs when two similar drugs are prescribed at the same time. Rarely are two drugs from the same category necessary to treat a medical condition.

Therapeutic duplication can occur when two different doctors are prescribing drugs for the same patient. This can also happen when a doctor changes a patient's prescription from one drug to another within the same therapeutic class but does not discontinue the first drug. In either situation, the patient may end up taking two drugs with similar actions, potentially leading to serious side effects.

If therapeutic duplication is identified by our claims system, the member's pharmacist may ask the member and his or her doctor whether he or she should be taking both drugs. The physician can then help determine if both drugs are necessary, or whether one of the drugs should be discontinued.

Generic Drugs

Drug manufacturers develop and release new drugs under a brand name. When the patent expires, other manufacturers are then able to make duplicate versions of the same drug. Generic drugs are chemically the same as their branded counterparts. They are also the same in dosage, safety, strength, form, and intended use. In addition, generics usually cost less than brand-name drugs.

Generic drugs are only available after the FDA approves them. When filling your prescription, your pharmacist generally can substitute a generic drug for a brand-name drug when the generic is rated by the FDA as equivalent and also where it is permitted by your doctor and state law.

Medications That are Not Covered

Your pharmacy benefit may not cover select medications. The following are some of the reasons a medication may not be covered:

- The medication has been shown to have excessive adverse effects and/or safer alternatives.
- The medication has a preferred formulary alternative or over-the-counter (OTC) alternative.
- The medication is no longer marketed.
- The medication has a widely available/distributed A-rated generic equivalent formulation.
- The medication has been repackaged. This is a pharmaceutical product that is removed from the original manufacturer container (Brand Originator) and repackaged by another manufacturer with a different National Drug Code (NDC).
- DESI drugs: Drug Efficacy Study and Implementation (DESI) drug products and known related drug products are defined as less than effective by the Food and Drug Administration, because there is a lack of substantial evidence of effectiveness for all labeling indications and because a compelling justification for their medical need has not been established.

Compounded or Bulk Products

Compound prescriptions require a prior authorization (PA) when a claim is \$400.00 or more.

Note: Check your benefit booklet, certificate of coverage, contract, member handbook, or prescription drug endorsement to determine the medication exclusions that apply to your plan.

Specialty Pharmacy Medications

Specialty pharmacy medications are high-cost drugs, including but not limited to oral, topical, inhaled, inserted or implanted, and injected routes of administration without regard to setting. They may require close supervision and monitoring of the patient's therapy or used to treat and diagnose rare or complex diseases, or require special handling, or are biologic/biosimilar drugs, or may have limited access or distribution.

For Specialty drug prior authorization:

- Your doctor must call or fax Prime Therapeutics Management Customer Service for prior authorization before submitting your prescription:
 - Phone: 1-800-651-8921
 - Fax: 1-888-272-1349

For Specialty drug distribution:

- Your doctor must call Shands Medical Plaza Pharmacy
 - 2000 SW Archer Road
 - Phone: 1-888-345-8270 or 1-352-265-8270
 - Open: M-F 8:30 a.m. – 5 p.m.
- Or call Prime Therapeutics Pharmacy LLC
 - Phone: 1-866-554-2673
 - Fax: 1-866-364-2673
 - Customer Service M-F 8 a.m. – 10 p.m. ET. On Call Pharmacists 24/7 for Urgent Requests.

Note: Check your benefit booklet, certificate of coverage, contract, member handbook, or prescription drug endorsement for information on how specialty pharmacy medications are covered on your plan.

TIER	DESCRIPTION
T0	Tier 0
T1	Generics
T2	Preferred Brands
T3	Preferred Specialty
T4	Non-Preferred Brands
T5	Specialty

TYPE	DESCRIPTION
QL	Quantity Limit There is a limit to the maximum amount of this drug that can be dispensed over a period of time.
PA	Prior Authorization Your provider is required to get prior authorization before you fill your prescription, which ensures appropriate use of the selected drug. Without prior approval, we may not cover this drug.
ST	Step Therapy In some cases, you may be required to first try certain drugs to treat your medical condition before you move up a “step” to other drug options.
C	Custom This drug has unique restrictions.
PA2	ADHD Products PA Required for members age 26 and older.
I	Infertility - Coverage Varies Infertility medications are only covered under certain circumstances.
ACA	ACA Preventive Drug The Affordable Care Act (ACA) requires certain preventive generic products to be covered at zero dollar copay. This does not include plans that are grandfathered.

PA Applies

Your provider is required to get prior authorization before you fill your prescription, which ensures appropriate use of the selected drug. Without prior approval, we may not cover this drug.

Quantity Per Day

There is a limit to the amount of this drug that is covered per day.

Specialty Drug

Specialty medications are often used to treat rare or complex chronic conditions, possibly require high-touch patient care, might need administration by a healthcare professional, can have special handling requirements, and/or could have limited access.
