

## DRUG LIST

# NetResults™ Formulary Prescription Drug Guide

## Introduction

The NetResults Prescription Drug Guide contains covered drugs for a broad range of diseases. It is organized into broad categories by Therapeutic Class. Generics drugs are shown in lower-case italic type. Brand prescription drugs are shown in capital letters.

The formulary is organized by categories depending on the type of medical conditions that they are used to treat. Medications are listed as Tier 1 Generic, Tier 2 preferred Brand, Tier 3 non-preferred Brand, Tier 4 preferred Specialty, and Tier 5 non preferred Specialty. All other drugs marked with NF or NC (non-formulary or not covered) are excluded on the formulary. Medications listed as “Specialty Drugs” are used to treat complex medical conditions that require special handling, administration, and member care management.

Our Pharmacy and Therapeutics Committee (P&T) and Value Assessment Committee (VAC) dedicate many hours to the clinical analysis and evaluation of peer reviewed literature and medical care guidelines to determine a drug’s safety and efficacy. After this rigorous clinical evaluation, the committee weighs the financial implications of a drug compared to other similar drugs and selects appropriate Tier placement based on the drug’s safety, efficacy, and cost-effectiveness. Please note all drugs on the Formulary Drug List are subjected to periodic review and amendment without notice.

Please keep in mind when a generic medication is chosen, patients pay the lowest copay available under their pharmacy benefit plan. When clinically appropriate, please consider choosing a generic product. If a preferred brand drug from the formulary is prescribed, your copay may be less than if a non-preferred brand drug is prescribed for you.

## Notice

The purpose of the NetResults Prescription Drug List is to provide a guide to coverage. Decisions about the need for a prescription drug and dosage of a prescription drug must be made solely by you and your physician in accordance with the patient/physician relationship.

*The drug list, also known as a formulary, is regularly updated. This list is subject to change.*
